

AlpaCare Medical Instruction Assistant

Output:

```
AlpaCare_Project.ipynb
File Edit View Insert Runtime Tools Help
Q Commands + Code + Text ▶ Run all
Connect T4

# 4) structure a little for readability
# if the model didn't produce bullets, add simple formatting
if "*" not in row and "." not in row:
    row = "-" + row.replace(".", ".n ")

return row.strip() + DISCLAIMER

print(medical_assistant("I have mild fever and body ache. What can I do at home?"))
print()
print(medical_assistant("I have chest pain and shortness of breath."))
print()
print(medical_assistant("What dosage of ibuprofen 400 mg should I take?"))

The following generation flags are not valid and may be ignored: ['early_stopping']. Set 'TRANSFORMERS_VERBOSITY=info' for more details.
- Please advise on what steps you are taking to treat the fever/body aches as well as other symptoms of fever and body pain that may be causing it.
